

1
South-Central Po Plain (Italy)
70 breeding pairs of Lesser Kestrel

2
Wider area of Municipality of Ioannina (Greece)
35-45 pairs of Lesser Kestrel

3
Wider area of Municipality of Komotini (Greece)
50-60 pairs of Lesser Kestrel

4
Island of Lemnos (Greece)
130 pairs of Lesser Kestrel

LIFE FALKON IN NUMBERS

66 Months of project

5 Partners
CNR-IRSA, ALDA, ISPRA, UMIL, HoS

In each area the LIFE FALKON Team will:

Install nest boxes

Involve local stakeholders

Implement awareness raising actions

Additionally, in Project Area 1 nesting towers will be built

Main Challenge:
Safeguarding the Lesser Kestrel and foster its expansion towards north

Lesser Kestrel dramatically declined in the second half of the 20th century (-91%) and only showed a mild recovery after the 2000. With LIFE FALKON we foster the small northern populations and thus the global recovery of the species.
